Fullstack Developer at Demoat

About Demoat

Demoat is a forward-thinking organization dedicated to fostering transparent and inclusive civic engagement. Its mission is to empower communities by facilitating open dialogue and creating platforms for collective decision-making. Demoat values integrity, inclusivity, and innovation, striving to build trust and collaboration among diverse groups.

Distinguishing features of Demoat include its state-of-the-art digital tools that simplify the process of community participation, making it accessible to all, regardless of technical proficiency. Additionally, Demoat emphasizes data-driven insights to inform community decisions, ensuring that every voice is heard and every opinion counts. By integrating cutting-edge technology with a deep commitment to social equity, Demoat stands out as a pioneer in the realm of civic engagement, continually working to bridge the gap between citizens and their governing bodies.

We are a team of passionate and dedicated individuals who are committed to [mention key Demoat goals or values]. We believe in [mention key aspects of Demoat culture, e.g., collaborative work environment, innovation, continuous learning, and growth].

Your New Role at Demoat

We are seeking a talented and motivated Fullstack Developer to join our growing team. As a Fullstack Developer at Demoat, you will be responsible for the design, development, and maintenance of both the front-end and back-end components of our web applications and platforms. You will work closely with other developers, product managers, and stakeholders to ensure the timely delivery of high-quality, seamless software solutions.

Your Role Accountabilities

- Design, develop, and maintain both front-end and back-end components of web applications and services.
- Write clean, well-documented, and testable code adhering to established coding standards and best practices.
- Collaborate with other developers to implement and integrate new features, ensuring smooth integration with existing systems.
- Participate in code reviews and provide constructive feedback, fostering a culture of continuous improvement.
- Work with product managers and stakeholders to gather requirements, define technical specifications, and ensure alignment between development and business needs.
- Troubleshoot and resolve technical issues, identifying root causes and implementing efficient solutions.
- Stay up-to-date with the latest technologies and best practices in fullstack development, proactively exploring and adopting new tools and frameworks to enhance development efficiency and solution quality.
- Contribute to a positive and collaborative team environment, fostering open communication and knowledge sharing.

Qualifications & Experience

- Strong experience in both front-end and back-end development, including frameworks like React, Angular, or Vue.js for the front-end, and Django, Flask, or Node.js for the back-end.
- Proficiency in HTML, CSS, JavaScript, and Python.
- Experience with RESTful APIs and web services.
- Familiarity with database technologies such as PostgreSQL, MySQL, or MongoDB.
- Understanding of version control systems such as Git.
- Ability to work in an agile environment and manage multiple tasks simultaneously.
- Excellent problem-solving skills and a collaborative approach to development.
- A strong commitment to writing clean, efficient, and scalable code.
- Excellent communication skills and a team-oriented mindset.
- Bachelor's degree in Computer Science, Engineering, or a related field (or equivalent work experience).

Compensation & Benefits
